

Premier Condos

San Francisco, CA

Scenario

As the newest landmark condominiums in San Francisco, this property desired to be the forefront of EV adoption. While still completing construction of the 600 luxury units, the developer decided to install 25 EV stations for resident use within the garage. In just 4 months and 25% occupancy thirteen EV owners have moved in and are leveraging charge stations today. At this rate over 40 EV owners are expected to move into this building by the end of 2016.

Solution

With EverCharge the building will not be capped at 25 chargers like it would with traditional EVSE. Leveraging SmartPower **over 125 charge stations can be installed** in the garage scaling to serve the growing needs of San Francisco residents without any additional electrical capacity. With this scalability the building becomes a true enabler of EV adoption for years to come. The building expects significant increases in EV demand with the release of the Tesla Model 3 and other mid range EV options.
