

# Public Charging Made Easy

A scalable, reliable charging  
solution for your public location.

[evercharge.com](https://evercharge.com)

# Unlocking the Value of Public EV Charging

EverCharge's unmatched technology, hyper-customizable solutions and turnkey approach are designed to simplify your public EV charging project and maximize its performance.

---

When you work with us, you'll:

---

## Save money

By allocating power in real time based on what each vehicle needs, EverCharge minimizes the need for expensive infrastructure upgrades – installing on average of 5-10x more stations at a lower cost.

---

## Operate smoothly

We'll give you a turnkey solution with ongoing technical support and real-time insights into the charging experience for project optimization.

---

## Scale as needed

By leveraging the building's existing infrastructure, EverCharge can scale easily, quickly and efficiently.

# How Public Charging Works

Our all-encompassing public charging solution includes the charging stations, a QR code-based payment system, and GLANCE™ charging management software.

## Level 2 and DCFC Charging Stations

Our level 2 charging stations provide simple and cost-effective deployments thanks to their unique design, featuring a fully integrated wireless mesh network and integrated disconnect. They don't require any cell repeaters, making them the perfect choice for both above- and below-ground parking scenarios.

Our DCFC solutions are designed to deliver high throughput in critical environments. Our 30kW - 240kW cabinets with aircooled dispensers support up to 4 vehicle outputs.

## Reliable Payment System

Broken credit card readers are one of the main reasons for non-operational public charging stations, leading to angry customers unable to charge. EverCharge uses a mobile first strategy that helps eliminate this problem.

Each charging station is equipped with a QR code for easy payment right from your mobile device. No app to download, and username and password to set up. The driver simply scans the QR code and follows the prompts to initiate a charging session.

## Real-Time Insights

GLANCE enables your team to view real-time charging data and reporting without integrations or expensive third-party hardware. This allows you to manage charging with access control, billing prioritization, optimized charging sessions, and customized charging experiences tailored to your needs.

# Your Partner For Every Step of the Electrification Journey

Since 2013, EverCharge has specialized in dynamic, real-time, and intelligent load management technology that **minimizes** the total cost and complexity of installation and management while **maximizing** the number of charging stations that can be installed. In 2022, EverCharge was acquired by SK Group, South Korea's second-largest conglomerate, as part of their multi-billion dollar investment in U.S. energy solutions and sustainable technologies.

The vertical integration of EverCharge's business model across engineering, manufacturing, and technology deployment allows EverCharge to develop tailored solutions specific for our customer's needs. Get in touch today.
